

TypePress — All-Features Markdown Example

A document exercising the full TypePress pipeline: Markdown structure, tables, code highlighting, math, mermaid, emoji, and CJK text.

Headings, Quotes, and Lists

TypePress renders Markdown without a browser — deterministic output, no headless-Chromium memory cost.

Unordered list

- First item
- Second item
 - Nested item A
 - Nested item B
- Third item

Ordered list

1. One
2. Two
3. Three

Tables with Alignment

Feature	TypePress	wkhtmltopdf
Math (KaTeX)	✓	✗
Mermaid	✓	✗
Markdown input	✓	✗
Binary size	~15MB	~40MB

Fenced Code with Syntax Highlighting

```
fn main() {  
  let msg = "hello from typepress";  
  println!("{}", msg);  
}
```

```
def fib(n: int) -> int:
    return n if n < 2 else fib(n - 1) + fib(n - 2)
```

Math

Inline math: the energy–mass equivalence $E=mc^2$.

Display math:

$$\int_0^{\infty} e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

Mermaid

```
graph TD
    A[Markdown] --> B[Preprocess]
    B --> C[Math & Mermaid]
    C --> D[Highlight]
    D --> E[fulgur Engine]
    E --> F[PDF]
```

Emoji and CJK

TypePress ships KaTeX math fonts and falls back to system fonts for everything else — 中文内容、日本語、한국어, and emoji 🌈 all work.
